

Steps:

1. Identify the chasm. Which polarization would you like to build a bridge over to the people on the other side?
2. Name what investment you have in bridging this polarization. What will keep you involved when the building encounters setbacks?
3. Get the right team. Who is your support and accountability?
4. Get the right materials. What do you have and what do you need to build a strong durable bridge that will be able to hold the weight of the bridge and weather the storms?
5. Identify the boulders: What are your struggles with this polarization (as you start building the bridge from your side)?

6. What are your anchors and cables to help you hold tension? (Help you keep peace)?

7. What are your towers that keep you thinking expansively under the compression?

8. What steps will you take to get to the other side?
